

M.2 to USB3.0 Development Board

This product uses industrial-grade components, suitable for LTE 42*30mm and 52*30mm modules with M.2 B key interface, supports dual SIM card slots, and reset button, no need to insert and dial multiple times, USB3.0 technology escorts 5G.

This product is suitable for 42*30mm and 52*30mm LTE modules with M.2 B key interface.

1. The PCB has 4 screw holes for easy installation.
2. Industrial-grade circuit protection, plug-in SIM card.
3. Working voltage: 3.3V
4. Product size specification: 94*31mm*18mm
5. Real-time display of working status LED

Installation guide:
